Work Experience

RISE — Brno, Czech Republic
Frontend Architect — 2025 - Present

- Led the complete architectural redesign of the core Electron application to improve modularity, scalability, and long-term maintainability.
- Championed the modernization of the technology stack, introducing new tools to boost developer productivity and application performance.
- Implemented a new development strategy by successfully migrating to a monorepo architecture, unifying the codebase and simplifying dependency management.
- Engineered significant optimizations for the Electron application bundle, resulting in a drastically reduced file size and faster startup times.
- Enforced strict TypeScript best practices across the codebase to enhance type safety, reduce runtime errors, and improve overall code quality.

PwC — Brno, Czech Republic
Frontend Developer Lead — 2022 - 2025

- Led a team of 6 frontend engineers, providing technical vision, mentorship, and hands-on leadership.
- Led a complex, zero-downtime migration of the entire application from Create React App to Next.js.
- Rearchitected the application's core to improve scalability and performance.
- Managed the full team growth lifecycle, including recruiting, interviewing, onboarding, and professional development.
- Served as the key technical liaison between the engineering team and stakeholders to translate business requirements into actionable strategies.

Oriflame — Brno, Czech Republic
Frontend Architect — 2019 - 2022

- Architected company-wide component library that unified design language and accelerated development cycles.
- Engineered a suite of build tools to automate project, library, and monorepo bootstrapping, enabling simple and non-disruptive upgrades.
- Designed and implemented unified CI/CD pipelines with Azure Pipelines and automated versioning, reducing manual overhead and minimizing release errors.
- Developed shared utility libraries that significantly reduced application bundle sizes and improved performance across all company web properties.
- Fostered a culture of technical excellence by providing architectural guidance, leading company-wide code reviews, and conducting technical workshops.
- Played a key role in scaling the engineering department by serving as a primary technical interviewer during the hiring process.

IXPERTA, s.r.o. — Brno, Czech Republic
Frontend Developer — 2015 - 2019

Skills

Languages: `TypeScript`, `C#`.

Frontend: `React`, `Next.js`, `Expo`, `Effect`.

Backend: `Node.js`, `Bun`, `Deno`.

Testing: `Vitest`, `Playwright`, `Jest`, `Testing library`.

Design: `Figma`, `Storybook`.

Styles: `Tailwind`, `CSS`.

Databases: `Prisma`, `Convex`, `Drizzle`.

Tools: `Git`, `Docker`, `Github Actions`, `Azure pipelines`, `Gitlab CI`.
